

# CLOSINGCORP ORDER MANAGEMENT RELEASE NOTES

Release Notes for June 24th 2021 Off-cycle Release

## CLOSINGCORP ORDER MANAGEMENT PATCH RELEASE NOTES

### ENHANCEMENTS

The following enhancements were made in this release:

---

#### ENHANCE USER INTERFACE FOR ADD ADDITIONAL PRODUCTS

**OM-1368:** Previously, Order Management used a plus sign (+) to represent the action of adding a new appraisal product, which was not intuitive to users. A new Add Appraisal icon was added to the top rail on the Order Detail page to make it easier to add appraisal products to an existing loan application.

---

#### EDIT APPRAISAL DUE DATE

**OM-1396:** A new permission, **Edit Appraisal Due Date on Rush**, was created, specific to appraisal orders with rush add-on selected. This permission:

- Enables a lender to control the number of days that users with permissions are able to select dates, as needed, so a reasonable amount of time is given for the appraiser to complete a rush appraisal order.
- Configures what roles are allowed to update the appraisal due date, to ensure the correct roles have functionality.

A new **Number of Days** field was added to the Appraisal Settings, next to the Role checkbox. Access this field from the Client Detail screen/Services tab. This field enables a user to determine the number of days allowed when a user attempts to update the appraisal due date.
