

Product Release Notes June 21, 2022

Order Management Hot fixes:

Update ServiceLink Flood Information Response

Please note: Impacts all Lenders who use ServiceLink.

Updated functionality so:

- When a Flood order in a status of *In Research* is updated as *Flood Cert Received*, the system returns a successful response to ServiceLink, updates the status in the display, posts the Flood cert to the order, and uploads the Cert to the lender.
- When a Flood order in a status of *In Research* is updated as *Needs More Information*, the system returns a successful response to ServiceLink, updates the status in the display, and sends a status update.

Captcha not generating on Forgot PW screen within Encompass

Fixed an issue occurring within Encompass when a user tried to reset their password. The required captcha was not appearing, as it should.

Current password not valid error when changing Broker user password

Fixed an issue occurring within Order Management when a Broker user tried to change their password. Instead, they received a *Current password is not valid* error and could not update the password.
