

## Production Release Notes March 22, 2023

### 3 Order Management Updates

#### Enhancement Overview:

Jira ID	Enhancement Name	Order Management Website & Application	Encompass	Integration API XML	Other
OM-5537	Enable Google Cloud Storage	X			
OM-4765	Update Active Title Order List View to Ensure Each Order Appears Only Once	X			
OM 5697	Disable Autofill Functionality – Web UI (User Interface)	X			

#### Enhancement: Details

<b>OM-5537</b>	<p><b>Enable Google Cloud Storage</b></p> <p>This feature will allow Order Management to utilize Google Cloud Storage as its primary repository for storing order related documents. This feature is part of a larger initiative to migrate the Order Management application to the Google Cloud Platform. The remaining migration of Order Management to Google Cloud Platform will occur on 4/14/2023.</p>
----------------	--

#### Fixed Issues: Details

<b>OM-4765</b>	<p><b>Update Active Title Order List View to Ensure Each Order Appears Only Once</b></p> <p>Updated the Title Order list view on the Active tab to ensure that an order appears only once.</p>
<b>OM 5697</b>	<p><b>Disable Autofill Functionality – Web UI</b></p> <p>Updating to disable autofill functionality on the Title Order web screen to ensure consistent user experience is achieved when manually populating title order fields.</p>
