

Order Management

SIT Release Notes September 1, 2023

6 Updates

Enhancement Overview:

Jira ID	Enhancement Name	Order Management Website & Application	Encompass	Integration API XML	Other
OM-5753	Branch Required Configuration	X			
OM-5754	Branch Required - API	X		X	
OM-5755	Branch Required - Batch	X			
OM-6472	Title Report Enhancement for Global Title Products	X			
OM-7604	Update Title State Table Allocation Functionality	X			
OM-7712	Update Title Order Functionality	X			

4 Enhancements - Detail:

OM-5753 Epic: OM-5756	Branch Required Configuration This feature allows Lenders to make branch a required field on Title orders. This configuration impacts web, API, and batch orders.
OM-5754 Epic: OM-5756	Branch Required - API This feature, if configured, requires Lenders to include a branch within the Title Order API.
OM-5755 Epic: OM-5756	Branch Required - Batch This feature, if configured, requires Lenders to include a branch within the Title Order batch request.
OM-6472	Title Report Enhancement for Title Products This feature adds an option for Lenders to receive a new Title Product Turn-Time Report that supports an expanded set of Title Products ordered.

2 Fixed Issues:

OM-7604	Update Title State Table Allocation Functionality This fix updates functionality to the Title State Table within the Admin Panel so that when a user with limited permissions accesses it, they can open the appropriate Allocation table selected.
OM-7712	Update Title Order Functionality This fix updates Title order functionality so that when an order is placed and subsequently cancelled, a new order can be submitted. Prior to this fix, when a Title order was placed and then cancelled, the system would not allow a new Title order to be submitted via the UI (User Interface).
