

Order Management

Production Release Notes October 4, 2023

3 Updates

Enhancement Overview:

Jira ID	Enhancement Name	Order Management Website & Application	Encompass	Integration API XML	Other
OM-8002	Update Orig Loan Date Required Field Indication	X			
OM-7333	Allow Additional Products to be Ordered on Multi-Family Property Type	X			
OM-7668	Update NewAppraisalOrder XML			X	

1 Enhancements - Detail:

OM-8002	<p>Update Orig Loan Date Field Required Indication</p> <p>This update enhances Title Order screen functionality so that the Orig Loan Date field is marked with a red asterisk (*) to indicate that the field is required to submit the Title order request.</p>
---------	---

2 Fixed Issues:

OM-7333	<p>Allow Additional Products to be Ordered on Multi-Family Property Type</p> <p>This fix allows the user to order a Product other than the 1025 when Property Type of Multi-Family has been selected and number of Units have been entered.</p> <p>Prior to this fix, the system would automatically update the Product to a 1025 when the order was submitted even though the user had selected another Product.</p>
OM-7668	<p>Update NewAppraisalOrder XML</p> <p>This fix updates the NewAppraisalOrder <NewOrder> functionality XML to include the LPAKey and DUCaseFileID.</p>
